

# BASES - COLUMNS - RISERS

*Special Base & Shields*

*Vertical Machine Base*

*13" X 72" Standard Base  
(3 Bases)*

*Special Base W/Gantry*

Hause machine bases simplify machine development and design, reduce machine assembly time and provide the high degree of rigidity necessary for better accuracy and lower overall building costs.

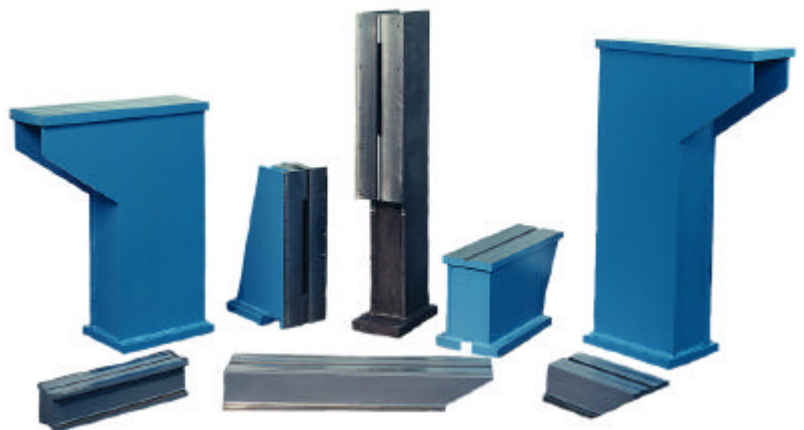

Standard machine bases include 24" x 24", 13" x 48", 13" x 72" (as shown above right) as well as round designs in a number of diameters. Standard bases include 3 point mounting, full cabinet and keyways as required.

Specially designed bases for specific build applications are also available (as pictured at left, and above left and center) and can include a full shielding package if required.

Standard risers and vertical columns for use with our Holomatic® units are available in a number of sizes and configurations. Designed and built for the rigidity necessary in this world of tight tolerances and harsh machining environments.

Hause Machines can also design specially suited risers, vertical columns and support bridges (as shown to the right) for your specific application as well as for mounting any variety of components.

When you need weldment risers built for the "Real World", contact **Hause Machines, Inc.** for a competitive quotation on your specific application.
